Noval van lock

Description

The Noval van lock is a very effective and practical lock if you open- and close the van doors frequently throughout the day.

Using premium quality materials, the Noval van lock has been designed to last in time.

The structure of the cylinder prevent the driver from accidentally leaving the lock in open position. The keys can only be taken out of the Noval when they are in locked position.

The Noval van lock is also available in keyed alike kits with 2-3 locks for installation on rear and side doors.
