## SBS Saturn EVO

### Description

Saturn Evo is a van lock combining in a single device reliability, simplicity and flexibility. Saturn Evo is always attached to the door enabling the user to choose freely when to secure the cargo with the hands always free to work. Made in stainless steel, it is an excellent deterrent against intrusions. Available in keyed alike kits of two or three locks for the installation on rear and side doors.

**An important advantage of this lock is that when open it shall be on the car door.**

If you have to leave your vehicle parked while working somewhere else or if you open/close the doors only a few times each day, the Saturn is the lock you need.

It fits side doors as well as rear doors and is available in a set of 2 equal conclusive locks.
