TC commercial vehicle locks

TC-2

Description

The TC-2 is a mechanically operated lock for commercial vehicles.

The TC-2 is very user friendly because it can be operated by using only one hand. By pressing the pin in the lock your goods are secured. No keys needed.

Installation of the TC-2 is quick and easy and uses standard tools. For an even faster installation we have the TC-2 'special'. This one uses pop rivets.

Technical information:

Material: Steel

Finishing: Anti-Rust treatment

Lock: Slamlock with built-in cylinder and 3 keys

Options

- Set of 2 equal conclusive TC-2's

TC-3

Description

The TC-3 is a mechanically operated lock for commercial vehicles.

The TC-3 is very user friendly because it can be operated by using only one hand. By pressing the pin in the lock your goods are secured. No keys needed.

The TC-3 differs from the TC-2 because of the extra stainless steel cover that ensures that the locking pin cannot be reached with burglary tools.

Technical information:

Material: Steel

Finishing: Anti-Rust treatment

Lock: Slamlock with built-in cylinder and 3 keys

Options

- Set of 2 equal conclusive TC-3's

TC-4

Description

The TC-4 is a mechanically operated lock for commercial vehicles.

The TC-4 is very user friendly because it can be operated by using only one hand. By closing the door your goods are secured because the TC-4 locks itself. No keys needed.

The TC-4 locks with a fixed bolt onto the door. When the doors is closed it locks itself in the TC-4. The TC-4 consists out of one solid part and thus cannot be reached by burglary tools.

Technical information:

Material: Steel

Finishing: Anti-Rust treatment

Lock: Slamlock with built-in cylinder and 3 keys

Options

- Set of 2 equal conclusive TC-4's
