SBS Trailer Support Stand

Description

The SBS Trailer Support Stand prevents the trailer from tilting over during loading and unloading with forklifts. It supports trailers of up to 25.000 kg!

The easy-to-use mechanical spindle allows you to adjust the height of the Support Stand from 1040 – 1330 mm.

The Trailer Support Stand is easy to move and has a striking yellow colour.

If needed, the Trailer Support Stand can be equipped with an Andis 1100 kingpin lock so that after loading/unloading the trailer can be locked quickly.
